

**REMARKS**

Claims 1-13 are pending, and all of the pending claims are rejected. Applicant submits a new set of drawings herewith. The claims are amended so that references to the figures are added. A new section "Brief Description of the Figures" is also added. Applicant believes that the new set of drawings is in accordance with USPTO rules. References are added to the drawings to identify the elements. The multiple dependency of the claims is removed, and capital letters are removed from the claims as pure procedural matters.

***Objection to the Drawing***

The Examiner correctly requires a drawing illustrating the invention with at least the following elements identified: visibility zones, computer application, locating means, potential visibility angle, and stored on a computer medium. Applicant herein identifies these elements and references them in the claims.

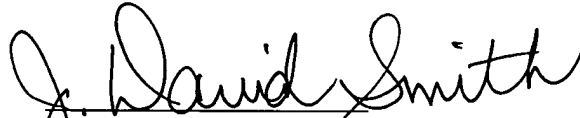

***Rejection under 35 USC 112***

The Examiner rejects claims 1-13 as allegedly unclear because of the recitation "at least one item of data about location and morphology of the element to be viewed." Applicant provides a drawing and references the elements to make this clearer.

*Conclusion*

Applicant submits that the claims are in condition for allowance. Expedient acknowledgement as such is earnestly requested. If any issues may be resolved by telephone, please call the undersigned at the telephone number provided below.

Respectfully submitted,

A handwritten signature in black ink that reads "J. David Smith". The signature is fluid and cursive, with a large initial "J" and a long, sweeping underline.
